BIO-BRITE CARPET SHAMPOO HANDWASH

Manual Carpet Shampoo

An alkaline concentrated detergent for manual carpet washing. This product is high foaming and therefore it cannot be used in a carpet washing machine. Suitable for all types of carpets, always rinse well after wash. Ensure a scrubbing action to create foam that will stay on top of the carpet. This procedure will make sure that all the soiling is concentrated in the foam above the carpet. Do not use too much water, try to make sure that the carpet is not saturated. This product is capable of removing 99% of all types of stains from a carpet.

FLOOR POLISH SELF-SHINE

Light Duty Acrylic Coating

Floor Polish Self Shine is a light duty acrylic coating used as weekly maintenance product for sealed floors. This coating repairs scratched or damaged polymer sealed floors, and reduces slipping and sliding. This coating can be applied on wooden floors or outside areas where in contact with sun and wet conditions. Floor Polish Self Shine is water based sealer, therefore it is easy to strip with SA Polichem Polistrip C/NA. For best results, apply at least twice a week on sealed floors. Regular spray and buff application is recommended.

Polispray is a water-based solution
Polispray is a water-based solution containing polymer. This is a maintenance product for acrylic sealed floors. Use Polispray to apply additional polymer layer on sealed floors and then buff them with red or white pad for high shine finish. Buffing sealed floors creates heat that enables the polymer to repair, fill and bond scratches. After spraying and buffing, the sealed floor looks like new again. Always make sure that floor is washed, dry and dust free before applying Polispray. Do not over-spray, the pad should be dry at all times.

POLIBUFF

Water Based Detergent with Polymer
Polibuff is a water based detergent, for use on all types of flooring. — for washing/cleaning and to add more polymer for buffing purposes. Polibuff polymer repairs scratches on sealed floors and prepares them for buffing with red or white buffing pad after floor is dry. Because it is of neutral pH, it is perfect for day to day application on acrylic flooring. As Polibuff is highly concentrated, it is very economical to use. It is a high foaming product and cannot be used with ride-on machines. Always rinse well after wash.

POLISTRIP C-NA

Polistrip C-NA is an alkali detergent used for stripping acrylic/polymer floor dressing. This product is highly concentrated, making it very economical. Always dilute correctly, allow at least 10 min contact time. Always use a black scrubbing pad for the quickest and best results. Make sure the floor is well rinsed afterwards, and washed off with SA Polichem Neutrifloor before being resealed.
